

SUPERSCOPE PRO

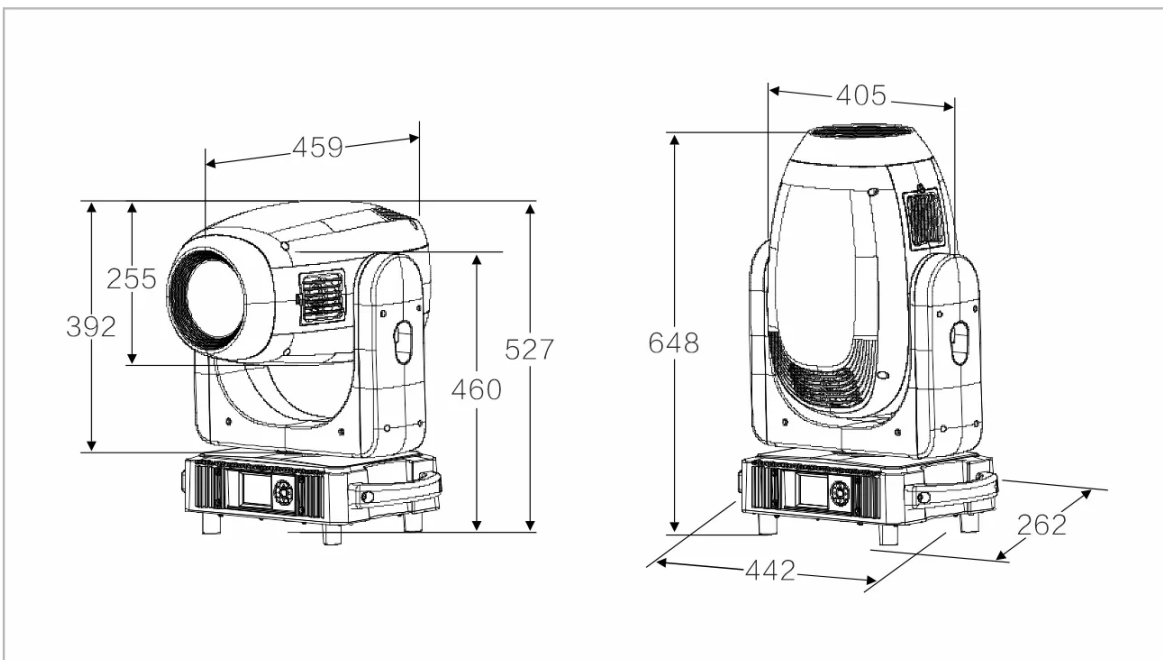

SUPER SCOPE PRO is a moving head light with beam spot wash profile 4 in 1 function. The optical system adopts high-precision optical components. With lens diameter of 133mm, the fixture can output light of long projection distance with high illumination. It can produce full beam and clear spot. The gobo module consists of 1 rotation gobo wheel . It has multiple pattern styles with high clarity and color consistency from the center to the edge of the pattern. The cutting

module can rotate $\pm 45^\circ$, the cutting image is clear without distortion. The output illuminance of SUPER SCOPE PRO can reach 26000lux@10m, and the RA can reach 90 by cutting into the high CRI piece. The product is small in size, light in weight, accurate in horizontal&vertical positioning, and fast in response. It's suitable for theaters, TV stations, large-scale concerts, gymnasiums and other high-end performance sites.

FEATURES

- Adopts energy-saving and environmentally friendly long lifespan LED module ;
- It is a BEAM SPOT WASH PROFILE 4 in 1 moving head computer light;
- Zoom angle: 4° - 53°;
- High CRI;
- With CMY infinite color mixing system;
